Preface

Congratulations on purchasing Livespeakr, the innovative and ultra-portable speaker system for the iPhone®, iPod® touch, and iPod® classic.

Thank you for supporting our product made by the customer, for the customer. Livespeakr was designed specifically to work with your iPhone®, iPod® touch, and iPod® classic. This system is meant to provide you with high-quality audio performance while giving you maximum portability. You can now share your multimedia collection with all your friends and family.

We are dedicated to providing you with the best and most user-friendly product on the market. Please follow these simple instructions to get you started with Livespeakr.

For technical issues, or just to tell us what you think, please contact us at: info@Livespeakr.com

Important safety instructions

Please read this owner's guide. Please take the time to follow the instructions in this owner's guide carefully. It will help you set up and operate your system properly and enjoy all of its advanced features. Please save this owner's guide for future reference.

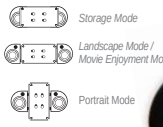
⚠ Warning: To reduce the risk of fire or electrical shock, do not expose the product to rain or moisture.

⚠ Warning: The apparatus shall not be exposed to dripping or splashing, and objects filled with liquids, such as vases, shall not be placed on the apparatus. As with any electronic product, use care not to spill liquids into any part of the system. Liquids can cause a failure and/or a fire hazard.

⚠ Warning: No naked flame sources, such as lighted candles, should be placed on the apparatus.

⚠ Note: The product label is located on the bottom of the product.

This product is intended to be used only with the power supply provided. Where the mains plug is used as the disconnect device, such disconnect device shall remain readily operable. This product must be used indoors. It is neither designed or tested for use outdoors, in recreation vehicles, or on boats. *Very important: Do not run-over, feed to animals, refrigerate or freeze your Livespeakr! You will break it.*



Unpacking & setting up your Livespeakr

NOTE: Your Livespeakr MUST be charged before initial use. For best use please drain the battery completely before recharging.

1. Gently remove your Livespeakr from the Reusable (and stylish) Portable Travel Box.
2. Please carefully slide your media player into the cradle by gently pushing it from the open side to the other. Make sure to look at the diagram on the cradle to ensure your media player is facing in the appropriate direction.
3. Connect Livespeakr to your iPhone® or iPod® touch using the headphone jack.
4. Enjoy your Livespeakr in any of the following modes:

Storage Mode — *Movie Enjoyment Mode*

Landscape Mode / Movie Enjoyment Mode

Portrait Mode

How to use your Livespeakr with the iPod touch®

To set up your Livespeakr to work with the iPod touch® you must first *reroute* the headphone cable. To do this, hold your Livespeakr with the power switch and mini USB port facing to the left and push the "Super" Cradle away from you until you hear a click. Then *reroute* the headphone cable so it is running through the tunnel that reads "Pod". Reattach the cradle by lining up the 4 guiding pegs and pulling the "Super" Cradle towards you until you hear a click. Your Livespeakr is now configured to work with the iPod touch®.

Livespeakr configurations

Storage Mode
This is the closed/starting position of your Livespeakr. Please note: You should dock or undock your media player or phone in this position only!

Portrait Mode
This is the primary position used when listening to music or enjoying all of the normal functions of your media player.

Landscape Mode / Movie Enjoyment Mode
This is the secondary position used for watching movies, TV shows, podcasts, etc. Use this mode to share your media with your friends!

Adusting the Volume

You may adjust the sound settings on your iPhone, iPod touch, or iPod classic to find which setting offers you the best possible sound for your Livespeakr.

Volume can be adjusted while your media player or phone is connected to your Livespeakr in either of the following ways:

1. Sliding the volume up and down on the screen of your media player or phone.
2. Using the +/- volume buttons located on the upper left side of your iPod touch or iPhone, or the click wheel on your iPod classic.

Charging your Livespeaker

You can charge your Livespeakr in either of the following ways:

1. Connect the USB charging cable to both your Livespeakr and a USB outlet (on your computer).

The USB charging cable should also work in your car, if your car has a USB port.

2. Connect the USB charging cable to your Livespeakr and the included wall charger.

The indicator light on the included wall charger will turn from red to green when the unit is fully charged. The unit will be fully charged after leaving it plugged in for approximately (5) hours (7 hours by USB). *You can also charge your media player or phone while listening to and/or charging your Livespeakr.*

To do so you must use the charger that came with your media player or phone, just connect as you would whenever charging it. Please Note: Livespeakr can be used while you are charging it.

How to rotate your Livespeakr (The 3 Click System)

Click 1: Simply slide the media player into your Livespeakr and the speakers are stored hidden behind the unit for maximum portability.

Click 2: Hold the center of your Livespeakr in place and give the "Super" Cradle a gentle rotation to the left (*counter-clockwise*). Doing so will rotate your Livespeakr 90 degrees to rest in the vertical or portrait position. The user will receive tactile feedback by feeling and hearing a click.

Click 3: Another twist will turn the unit another 90 degrees; the speakers will expand and the unit will click into place.

Livespeakr is now in landscape mode for viewing all of your multimedia files. Simply reverse these clicks to put your Livespeakr back into storage.

How to use your Livespeakr stand

1. With the power switch and mini USB port facing up, carefully slide the entire metal stand downwards until you hear a click.
2. Fold the stand down until it lays flat on the surface it will be resting on.
3. Utilize the "stability legs" by placing them in the viewing angle pegs that suit you best.

Audio Quality

Q: Why does the audio quality vary from song to song?
A: Your music is compressed using MP3 format which varies in quality depending on the bit rate it was encoded at. It is recommended that you use a minimum of 128 kbit/s bit rate, with the optimal being 192 kbit/s bit rate for best sound quality. A sample rate of 44.1 kHz is also highly recommended for best sound quality.

Q: How can I modify the sound output?
A: Using the built-in EQ settings on your media player you can enhance your sound experience.

On iPhone:
- From the Home screen, tap the Settings application
- Tap the iPod item in the menu
- In the next menu tap the EQ item (a list of preset EQ settings will appear)
- Choose a preset EQ setting (i.e. Bass Reducer for a song that has too much bass) from the list which sounds best to you (as you choose items in this list and play your music, notice how the sound of the song changes).

Turning the Unit ON/OFF

Q: How do you turn this thing on? Or, better yet, how do you turn it off?
A: You will find an on/off switch located on the top or your Livespeakr. When the unit is on you will see a green LED light illuminated. When it is off (or not charged) the LED will be off. If the unit will not turn on try recharging it. To turn it off, simply turn the switch off and note the LED is now not illuminated.

Frequently Asked Questions

Q: Is there supposed to be sound or air coming from the small ports above the main speakers?
A: No, these are for aesthetic purposes only.

Q: Is there a volume limiting option?
A: Yes, on your media player you can limit how loud you want your volume to go. To access this feature follow these instructions:

On iPhone:
- From the Home screen, tap the Settings application
- Tap the iPod item in the menu
- In the next menu tap the Volume Limit (you may now select the maximum volume)
- When a desired maximum volume limit is set, tap the "Lock Volume Limit" button to save your setting.

On iPod touch:
- From the Home screen, tap the Settings application
- Tap the Music item in the menu
- In the next menu tap the Volume Limit (you may now select the maximum volume)
- When a desired maximum volume limit is set, tap the "Lock Volume Limit" button to save your setting.

The names given to the EQ presets are only to be used as guides. The final say in what EQ setting you choose will ultimately fall upon your preference. It's all about what sounds best to you.

On iPod touch:
- From the Home screen, tap the Settings application
- Tap the Music item in the menu

The names given to the EQ presets are only to be used as guides. The final say in what EQ setting you choose will ultimately fall upon your preference. It's all about what sounds best to you.

Q: What is the optimal volume setting for my media player?
A: The top 50% of the volume setting on your media player is the optimal volume setting. At low volumes on your media player you likely will not be able to hear your Livespeakr.

Q: Why is sound coming out of only (1) speaker?
A: Make sure the headphone jack is completely plugged-in. Try unplugging it and re-plug it back in. If the does not work, try resetting your media player. If this does not work, please contact customer support.

Q: How do I use the Stand properly?
A: 1. With the power switch and mini USB port facing up, carefully slide the entire metal stand downwards until you hear a click.
2. Fold the stand down until it lays flat on the surface it will be resting on.
3. Utilize the "stability legs" by placing them in the viewing angle pegs that suit you best.

Using the Stand

Q: What do I do if I expanded my Livespeakr by pulling on the speakers? (Foldable should be avoided.)
A: Simply push the speakers back into their contracted position and twist the "Super" Cradle all the way to the right (clockwise). Your Livespeakr should now be functioning correctly.

Rotating your Livespeakr

Q: How do I properly rotate my Livespeakr?
A: Carefully hold the main base of your Livespeakr and take hold of the cradle. Then rotate the unit counterclockwise to expand the speakers. Repeat the process in reverse to collapse the speakers. Please, **DO NOT** expand the speakers by pulling on them.

Q: Can I use my Livespeakr while it's being charged?
A: No, unfortunately, the unit will just shut off when it is out of battery.

Charging your Livespeakr's battery

Q: Why long does my Livespeakr take to be charged?
A: Yes, you can charge it using the wall charger (7) hours using the USB cable. It takes slightly longer for USB due to drawing power from your computer.

Q: Should the red LED indicator light on the wall charger change colors when it is fully charged?
A: Yes, the red LED indicator will turn green indicating the unit is fully charged. The unit will be fully charged after leaving it plugged in for approximately (5) hours (7 hours by USB).

Q: Does the green LED indicator light on my Livespeakr indicate it is fully charged?
A: No, this is not a fully charged indicator. This LED only indicates if your Livespeakr is turned on. The unit will be fully charged after leaving it plugged in for (5) hours (7 hours by USB). However, the LED on the wall charger will change colors to green indicating it is fully charged.

Q: What does an orange light on my Livespeakr charger indicate?
A: An orange colored light indicates your Livespeakr is fully charged, but also turned on.

Q: Why long should my Livespeakr play for when it is fully charged?
A: A fully charged Livespeakr should play continuously for up to 15 hours.

Q: Is there an indicator for low battery?
A: No, unfortunately, the unit will just shut off when it is out of battery.

Static Interference

Q: Why am I hearing some light feedback?
A: First, please make sure that your Livespeakr cable is completely plugged into your unit. Next, when your Livespeakr is plugged into the wall or your computer and is away from any nearby electronics. Then, restart your iPhone and turn on/off your Livespeakr and take it away from any nearby electronics and see if it persists please unplug your Livespeakr. This is due to the fact that although your Livespeakr itself is shielded against interference other electronics are not. If it persists please unplug and turn on/off your Livespeakr. This should resolve the issue. Your Livespeakr should not encounter these issues when using it on the go, if for some reason it does please contact customer support.

Q: What is this "popping" noise I am hearing?
A: Unfortunately this happens regardless to what you media player is plugged into. If you have it plugged in to your battery made headset the same issue will occur, I just won't be as amplified because all audible frequency which is amplified though any are not external speakers. GSM network's use cell towers. Unfortunately, even with shielding you cannot prevent this.

Q: Why am I hearing static interference when I plug my Livespeakr into my phone or media player?
A: Occasionally, particles of dust and debris can fall into the headphone jack of your phone or media player and cause some interference. You can use a compressed air "dust remover", or simply blow into the headphone jack to clear excess dust and debris.
